## ROWING BOAT SIMULATOR

realistic movement, pleasant background noise

### Setup

You can arrange competitions, directly opposite each other is possible. The rowing simulator may not be suitable for short hard sprints. Rather for either a long race (3-4 minutes) or as an excellent eye-catcher for hands-on activities without a competitive factor. Rowing is a fascinating sport which will activate the entire body muscles. Bring that experience to the visitors of your Event in more detail. Competitions can be fought directly against each other. We can place your logo directly on jerseys and boats.

Software: Virtual Reality and / or we are able to implement a real race-course by a real video and integrate the track in the software to match the rowing stroke or speed.
