MOTION SEATS - 5D Cinema - 3 D.O.F.

Modular upgradable 5D cinema with mobile dual seats

Features & setup

- **Modular upgradable 5D cinema**
- From 2 persons / 4 / 6 / 8 / 10 / 12 / 14 / 16 / 18 / etc.
- Seat lift: 30cm in 1 second
- Number per row and number of rows as required
- Can be fitted next to or behind each other & production of individual platform sizes
- Branding on the covers and outer area possible
- Does not require pre-fitted steps, bellow box below the seats, instead a sturdy, strong flat surface
- Room monitoring by means of infrared cameras, so that the supervising staff can intervene in the event of an emergency and activate the emergency stop switch
- Emergency stop button between the seats. Before every viewing, the visitors are shown an intro film (text, sound and graphics) that explains how to press the emergency stop button so that the seat stops moving and returns to its original position

Optional

- Seat belts if required
- The sensors installed ensure that the Motion Seat is deactivated when the visitor leaves the seat. The film is stopped within 5 seconds, the light goes on and the viewing is stopped for safety reasons. Nobody may be in the room whilst the film is showing; only on the Motion Seats in the simulation mode when the film is showing.
- Intelligent Motion-Seat technology ensures that unoccupied dual seats do not move during the film for safety and energy-saving reasons
- Coloured seats (black, grey-black, orange-black, blue-black, red-black, white-black)

Effects on the Motion Seat:

- Chair vibrates
- Feet are tickled via air blowers
- Neck is tickled via air blowers
- Hips are tickled via air blowers (side effect)
- Armrest blower
- Air bubbles (variable setting via the seat and the effect bar, air quantity can be regulated proportionally)

Optional effects in the room:

- Wind (can be regulated proportionally)
- Fog effect (only if there is continuous and fast air circulation in the room)
- Aroma & odour effects (only if there is continuous and fast air circulation in the room)
 - Soap bubbles white (can be used in front of the visitors)
 - Soap bubbles shine gold in UV light (can be used in front of the visitors)
 - Falling snow, disappears completely (can be used in front of the visitors)
- Laser (can be combined well with fog)
- Lightening
- CO 2 effects (bright white, on request)

Films & advertising:

- New films via the Internet and as required (also, retrospectively)
- Film update & settings per remote maintenance
- Licence period of the films is at least 6 months
- Completely maintenance-free operation
- Individual maintenance agreements are available

Features & Setup

- **Modular upgradeable 5D Ride Station**
- Moving dual-seat Motion Simulator with large screen for 2 persons
- Functions via a coin box
- Films are selected at the push of a button
- Emergency-stop button between the seats stops the seats moving, the Motion Seat moves back to its original position, the films continues until the end
- The visitor can take inexpensive 3D polarisation glasses from a box and return them after the film
- Ideal for hotels as attractions in the entertainment areas, in amusement arcades, etc.
- New films via the Internet and as required (also, retrospectively)
- Film update & settings per remote maintenance
- Licence period of the films is at least 6 months
- Completely maintenance-free operation
- Individual maintenance agreements are available

5D 2 Seat-Cinema-System

- 3D Projections Screen set polarization based (optional: 3D display/version hotel)
- Double Motion Seats incl. vibration, air, sound effects, 3DOF, power supply 220v/50Hz
- 5.1 Audio installation
- Effects in cinema, fog, lightning, wind
- 3D playback server for 3D Movies, effect control, programmable movie list with remote control plus delivery costs, installation costs, 3D film licenses package
