SKY DIVE - PARACHUTE SIMULATOR

Automated process - event driven
Event simulator with care
Customer optimized

Features:

- ✓ Powerful flight simulation software
- ✓ with 3D head mounted display and visitor display
- ✓ with head tracking, feel free in all direction
- ✓ start, stop & emergency button
- ✓ customized branding and story board
- ✓ full motion simulator
- ✓ skydiver goes up after start
- ✓ platform moves down
- ✓ wind machine blows
- ✓ radio instructions guide the parachutists

Basic System:

Event simulation with care

Automated process - Event driven:

Visitor start and stop without care

Customer optimized:

Fun, training, incentives

Basic Info:

Dimensions/structure: (LxWxH) approx. 2,80×1,80×3,00meter

Simulator knock down: (LxWxH) approx. 2,20×1,80×1,50meter (part A)

Simulator knock down: (LxWxH) approx. 1,20×1,80×2,00meter (part B)

Alternate: fixed base (no 2 parts), mobile display stand

Power: 230V (110V) / 50Hz; Weight: approx. 250 kg

Compressed air min 4bar - max. 8bar operating pressure

Video Display: Oculus Rift

Materials: Wood MDF quality in B1

***Ultra-Realistic Flight Simulation
with X-Plane 10***

Virtual Parachuting

SKYDIVE SIMULATOR

Customised solution in colour green.
 Visualization via 3d-glasses and headtracking system.
 Separate display obstructed in wooden case used look.
 chain-link fence-faced.

Fully automated simulation-start and stop by pressing a button.
 While starting, the jumper will be pulled up by the muscles and
 the platform will sink down. Additionally air blows from the
 bottom to simulate some winds. Radio messages and
 instructions will lead the jumper into the goal of the
 simulation. After that, the jumper will get back to the
 ground by relaxing the muscles and the platform
 also goes upwards. The paintwork of the simulator
 can be customised. The ultra realistic simulation
 will be individually created
 by a prescribed story-
 board of the customer.
 If desired, buildings and
 terrain of your home
 region will be placed
 into the simulation.

buildup example for an center, colored customized

Basic System:

Event simulation with care

Conventional full-motion simulator with typical care like events, trade fairs
 (requests and changes after consultation and storyboard)

Automated process - Event driven:

Visitor start and stop without care

Stand Alone system without helper, optimal for an center, exhibition
 incl. custom-made storyboard, branding, radio instruction
 (requests and changes after consultation and storyboard)

All prices are quoted net in euro without the applicable VAT.
 Delivery time approx. 10 weeks
